PROFILE

Product engineering leader with 7+ years building and shipping web and mobile products across fintech, investments, rewards, AI, and consumer platforms. Combines hands-on Next.js, TypeScript, Firebase, and Flutter engineering with technical leadership and product judgement to turn complex requirements into reliable customer experiences. Strong in architecture, API integration, release quality, cross-functional delivery, and trust-sensitive product decisions.

CORE CAPABILITIES

Engineering	Web product engineering, Next.js, TypeScript, Firebase, Flutter, Dart, Web and mobile architecture, REST API integration, Testing, CI/CD, Production reliability
Leadership	Technical planning, Requirements clarification, Cross-functional delivery, Release coordination, Product judgement, Customer experience

PRODUCT ENGINEERING EXPERIENCE

Senior Mobile Engineer
FCMB - Rova

2022 - Present

Consumer fintech platform

- Built secure mobile journeys across savings, investments, wallets, KYC, and onboarding.
- Translated product and business requirements into customer-facing experiences with clear transaction, loading, error, and recovery states.
- Partnered with product, design, backend, QA, and business teams on architecture, release quality, performance, and production stability.
- Contributed technical judgement on trust-sensitive financial flows and customer experience.

Mobile Architect / Product Development Lead
Givviepoints

2022

Rewards and loyalty products for SMEs

- Led architecture and hands-on delivery across rewards, vouchers, merchant tools, redemption, and customer-facing mobile and web experiences.
- Translated merchant and customer needs into product journeys, technical specifications, scalable architecture, and releases.
- Connected engineering decisions to operational simplicity, retention, and repeat engagement.

Lead Mobile Developer
Preophs Limited

2021 - May 2022

Savings and investment platform

- Built the mobile interface, integrated product APIs and custom SDKs, and supported secure investment and payment experiences.
- Used automated testing and CI/CD practices to strengthen release quality and delivery confidence.

EARLIER ENGINEERING EXPERIENCE

Lead Mobile Developer

2020 - Jan 2021

Zinvest

- Built Flutter interfaces and API integrations for customer savings, bonds, and treasury-bill journeys.

Mobile Developer

2019

NCK Technologies

- Built mobile interfaces, integrated APIs, and contributed to a large-scale refactor that combined multiple applications.

Full Stack Developer

Mar - Jul 2017

Schoolable

- Built backend and frontend functionality for the first version of a school-management product.

SELECTED INDEPENDENT WEB AND MOBILE PRODUCT ENGINEERING

Portfolio - Web, mobile, and AI workflows

Designed and built an AI career product that structures CVs and work records into evidence-led career materials; recorded 139 CV uploads during early validation.

Quest - Consumer web product delivery

Designed, built, and launched a responsive web product for discovering and coordinating real-world social experiences in Lagos.

Independent delivery

Worked across customer-facing web and mobile experiences, Firebase-backed services, API integrations, AI workflows, release, and iteration.

PRODUCT JUDGEMENT IN ENGINEERING

Customer discovery, product specifications, funnel analysis, and experiment design are used to clarify requirements and technical priorities. They support engineering leadership rather than presenting a separate product-management role.

EDUCATION

B.Eng., Electrical and Electronics Engineering

Federal University of Technology, Owerri

2011 - 2016

CERTIFICATIONS

- Product Analytics Certification - Product School
- Activation and Retention Strategy - Udacity
- Agile Meets Design Thinking - Coursera
